

SEAMLESS. SUBLIME. SMART.

THE MUSICBOOK SERIES

## LINDEMANN MUSICBOOK. THE NEXT GENERATION.

With the musicbook series you'll get everything from a single source: classic CD playback, streaming in studio master quality, analog preamps as well as matching power amps. And all this in the third generation already!

Behind the compact façade resides genuine high-end in the very finest workmanship. The musicbooks can replace big hi-fi systems and still promise outstanding sound quality.

This is no longer a contradiction these days: owing to state-of-the-art parts and production methods excellent technology can be realized in a tiny space.

What else can we say? With the musicbook series you'll get a plenty of features, ultimate performance and tone quality at the limits of technical feasibility.

For everything else, best listen for yourself.

## DESIGNED AND MADE IN GERMANY.

The musicbook series is designed and made made by a passionate and creative team of engineers in Germany. It is the essence of over 25 years of experience in the development of analog and digital hi-fi components.

## UNCOMPROMISING QUALITY.

It is our ambition to play quite on top, both soundwise and technologically. To this end we do many things in a different way and some in a smarter way than our competition. This leads to the crucial plus in sonic quality which sets the musicbooks apart.

*"It still exists, that famous  
Quality made in Germany."*  
(HiFi Einsnull / Germany)

*"You are not going to own just one  
Lindemann Musicbook, you are going to  
pick up the whole library."  
(Hi-Fi News / UK)*

# THE MUSICBOOK NETWORK PLAYERS

## STREAMING 4.0

Music listening like at the studio. A long-cherished dream becomes true – thanks to online streaming in studio master quality with the musicbook network players!

But there is more: we have invested a lot of time and effort into a new streaming platform and an intuitive, easy to operate app which allows music playback in the finest sound quality everywhere around your home via WiFi or cable.

# MUSICBOOK:COMBO

The first all-in-one music player from LINDEMANN with a unique design and truly audiophile genes!

The musicbook **COMBO** joins the proven streaming platform of the musicbook SOURCE II and the power amp technology of the musicbook POWER II. Simply connect the matching speakers - and you're set to enjoy music in its most beautiful form.

No matter whether from streaming services or from a music server, from CDs or LPs, almost

every playback is possible and conveniently operable via the app. Also the friends of high-quality headphones get their full money's worth: the built-in headphone amp sets benchmarks in this class. And the icing on the cake is the excellent phono MM input for turntables!

The musicbook COMBO is our distillate from 30 years of experience in the development of amplifiers and digital sources. A true all-rounder and the new heart of your hifi system for many years to come.

Easy and stable operation with the LINDEMANN app or via remote control

Integrated power amp included - an unbeatable combination with the right speakers!

Streaming in several rooms with the multi-room function

Phono-MM preamp with exceptional sound quality

Five streaming Tidal Connect, Qobuz, Deezer, Spotify Connect, HighResAudio and Roon Ready

# CONNECTION OVERVIEW

# MUSICBOOK:SOURCE II

A signal source that can do everything and sets new sound standards?

Here you are: the **SOURCE II** is not just an extremely versatile network player, but also an analog preamp and D/A converter that meets even the very highest demands. No matter if the music comes from streaming providers or a music server, from CDs or LPs – everything is possible and conveniently operated via app. Friends of high-grade headphones also get their full money's worth: the

built-in headphone amplifier sets benchmarks in this class. But the icing on the cake is the excellent phono-MM input for turntable!

Connected to a suitable power amp such as the musicbook **POWER II** or straight to active loudspeakers, the **SOURCE II** guarantees music at its most beautiful. With a richness of detail and yet relaxed, reproducing a wide stage or a small ensemble, with a dynamic grip or soft and soulful.

Easy and stable operation with the LINDEMANN app or via remote control

Top level CD player with internal (optional) or external drive

Streaming in several rooms with the multi-room function

Phono-MM preamp with exceptional sound quality

Five streaming providers: Tidal Connect, Qobuz, Deezer, Spotify Connect, HighResAudio and Roon Ready

# CONNECTION OVERVIEW

# MUSICBOOK: POWER II 500/1000

What actually constitutes a good power amplifier?

Sufficient output power, good measured values with low distortions and a high damping factor, maybe also a high efficiency. That's right, but it doesn't say a lot about the sonic result which can be achieved with a loudspeaker. A really good power amp can drive a loudspeaker in such a way

that even the very last bit of musical information becomes perceptible. And this in a sovereign and totally relaxed manner.

Not only is the musicbook **POWER II** the ideal game partner for the musicbook **SOURCE II**, it also knows how to get maximum musicality out of a loudspeaker. Of course, with excellent measuring data and minimum power consumption.

Vertical bi-amping	Relaxed and natural sound	Free from sound effects due to N-CORE technology
	N-Core®	
Available in two different model versions: 2 x 250 watts or 2 x 500 watts	Up to 5 times greater efficiency than with conventional amplifiers	Comprehensive protection circuit and intelligent temperature monitoring

*“Teamed with the matching musicbook power amp,  
we consider Lindemann’s series a high-end system  
that’s difficult to beat when it comes to musicality,  
sound, operation and also in terms of design.”  
(Stereo / Germany)*
