

# THE LIMETREE SERIES

## YOUR AUDIOPHILE ESSENTIALS

[www.lindemann-audio.com](http://www.lindemann-audio.com)

# WHY LIMETREE?

Because our chief designer Norbert Lindemann had the idea for this series under a limetree? Well, maybe. But above all because sometimes less is more. As we all know, many parts and a big enclosure are by no means a guarantee for good sound. Quite the opposite! In view of the advancements in miniaturization in the electronics sector, small but fine products are becoming more and more performant. This does not only apply to smartphones, but to audio devices just as well.

Thus the Limetrees offer true high-end sound quality on a minimum footprint. No matter if analog or digital, whether as a phono preamp, a USB-DAC or a network player. The devices of the Limetree series are each custom-built for a single task. And this they can handle with flying colors.

**Because sometimes less is more.**

**Limetree**  
powered by Lindemann.

„SMALL IS SMART, AND SMALLER  
IS EVEN SMARTER. THE LINDE-  
MANN COMPANY HAS RECOGNI-  
ZED THESE SIGNS OF THE TIME.“

(FAIRAUDIO / GERMANY)

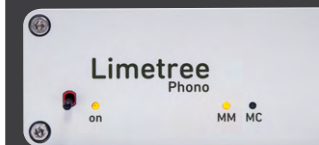

# LIMETREE PHONO II

The **Limetree PHONO II** is our statement for all friends of the vinyl LP. A high-class preamp for your pickup system.

Using the latest technologies and parts we reanimated a circuit design from the tube amp era. The result is exceptional, award winning and absolutely worth listening to!

Open, detailed and natural sound which makes any turntable sound better

Separate inputs for MM and MC

Excellent measured values

Use of the best amplifiers, which are currently available

Plug & Play:  
simply plug in and  
you're ready to go

„THERE WOULD BE NO REASON TO  
BE EMBARRASSED BY HAVING A  
LIMETREE AS YOUR PHONO STAGE  
EVEN IF YOU OWNED A £10,000  
TURNTABLE.“

(STEREONET / UK)

# LIMETREE USB-DAC

The **Limetree USB-DAC** is an ultimate quality digital-to-analog converter that is also equipped with an analog volume control and a headphone amplifier. The rotary knob control and the included remote make it the ideal partner for music playback on a PC or Mac.

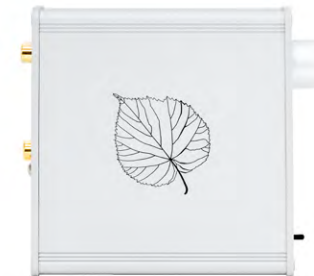

For this purpose it's simply connected to a USB port or a notebook or desktop computer with a USB cable, thereby replacing the internal soundcard of the respective device. That way the sound quality of the music playback can be raised to the level of even the finest (and most often considerably higher priced) hi-fi components.

Playback up to  
DSD 512 and  
PCM 768 kHz

ES9038 Sabre DAC  
with MEMS femto  
clock

Analog volume  
control via  
remote control

Absolute top-class  
headphone amplifier

Connection to  
power amps or active  
loudspeakers

# THE LIMETREE NETWORK PLAYERS

## STREAMING 4.0

Music listening like at the studio. A long cherished dream has come true – thanks to online streaming in studio master quality with the Limetree network players!

Whether as NETWORK with an integrated world-class converter or as a digital BRIDGE with a sample rate converter from the studio technology sector. We've put much time and effort into a new streaming platform and new apps which are easy to use and, owing to WiFi or cable, allow to play music everywhere in the house with an excellent sound quality.

# LIMETREE NETWORK II

The **Limetree NETWORK II** is a high-quality network player which can play back music in studio master quality from streaming services and local storage media. It is connected to the network either by a LAN cable or via WLAN. Furthermore, it offers a USB port for connecting harddisks or USB storage media. In addition to an analog line-level output, the network player is equipped with a high-grade headphone connection.

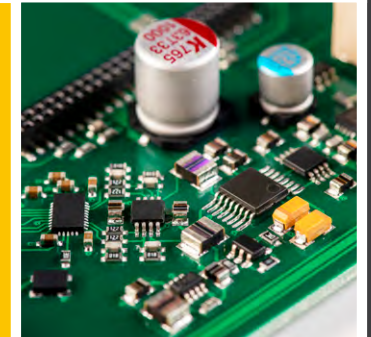

Connection of external  
CD drives via USB

Stable and intuitive  
operation with the  
LINDEMANN app or  
the remote control

High-quality,  
independently  
adjustable headphone  
amplifier

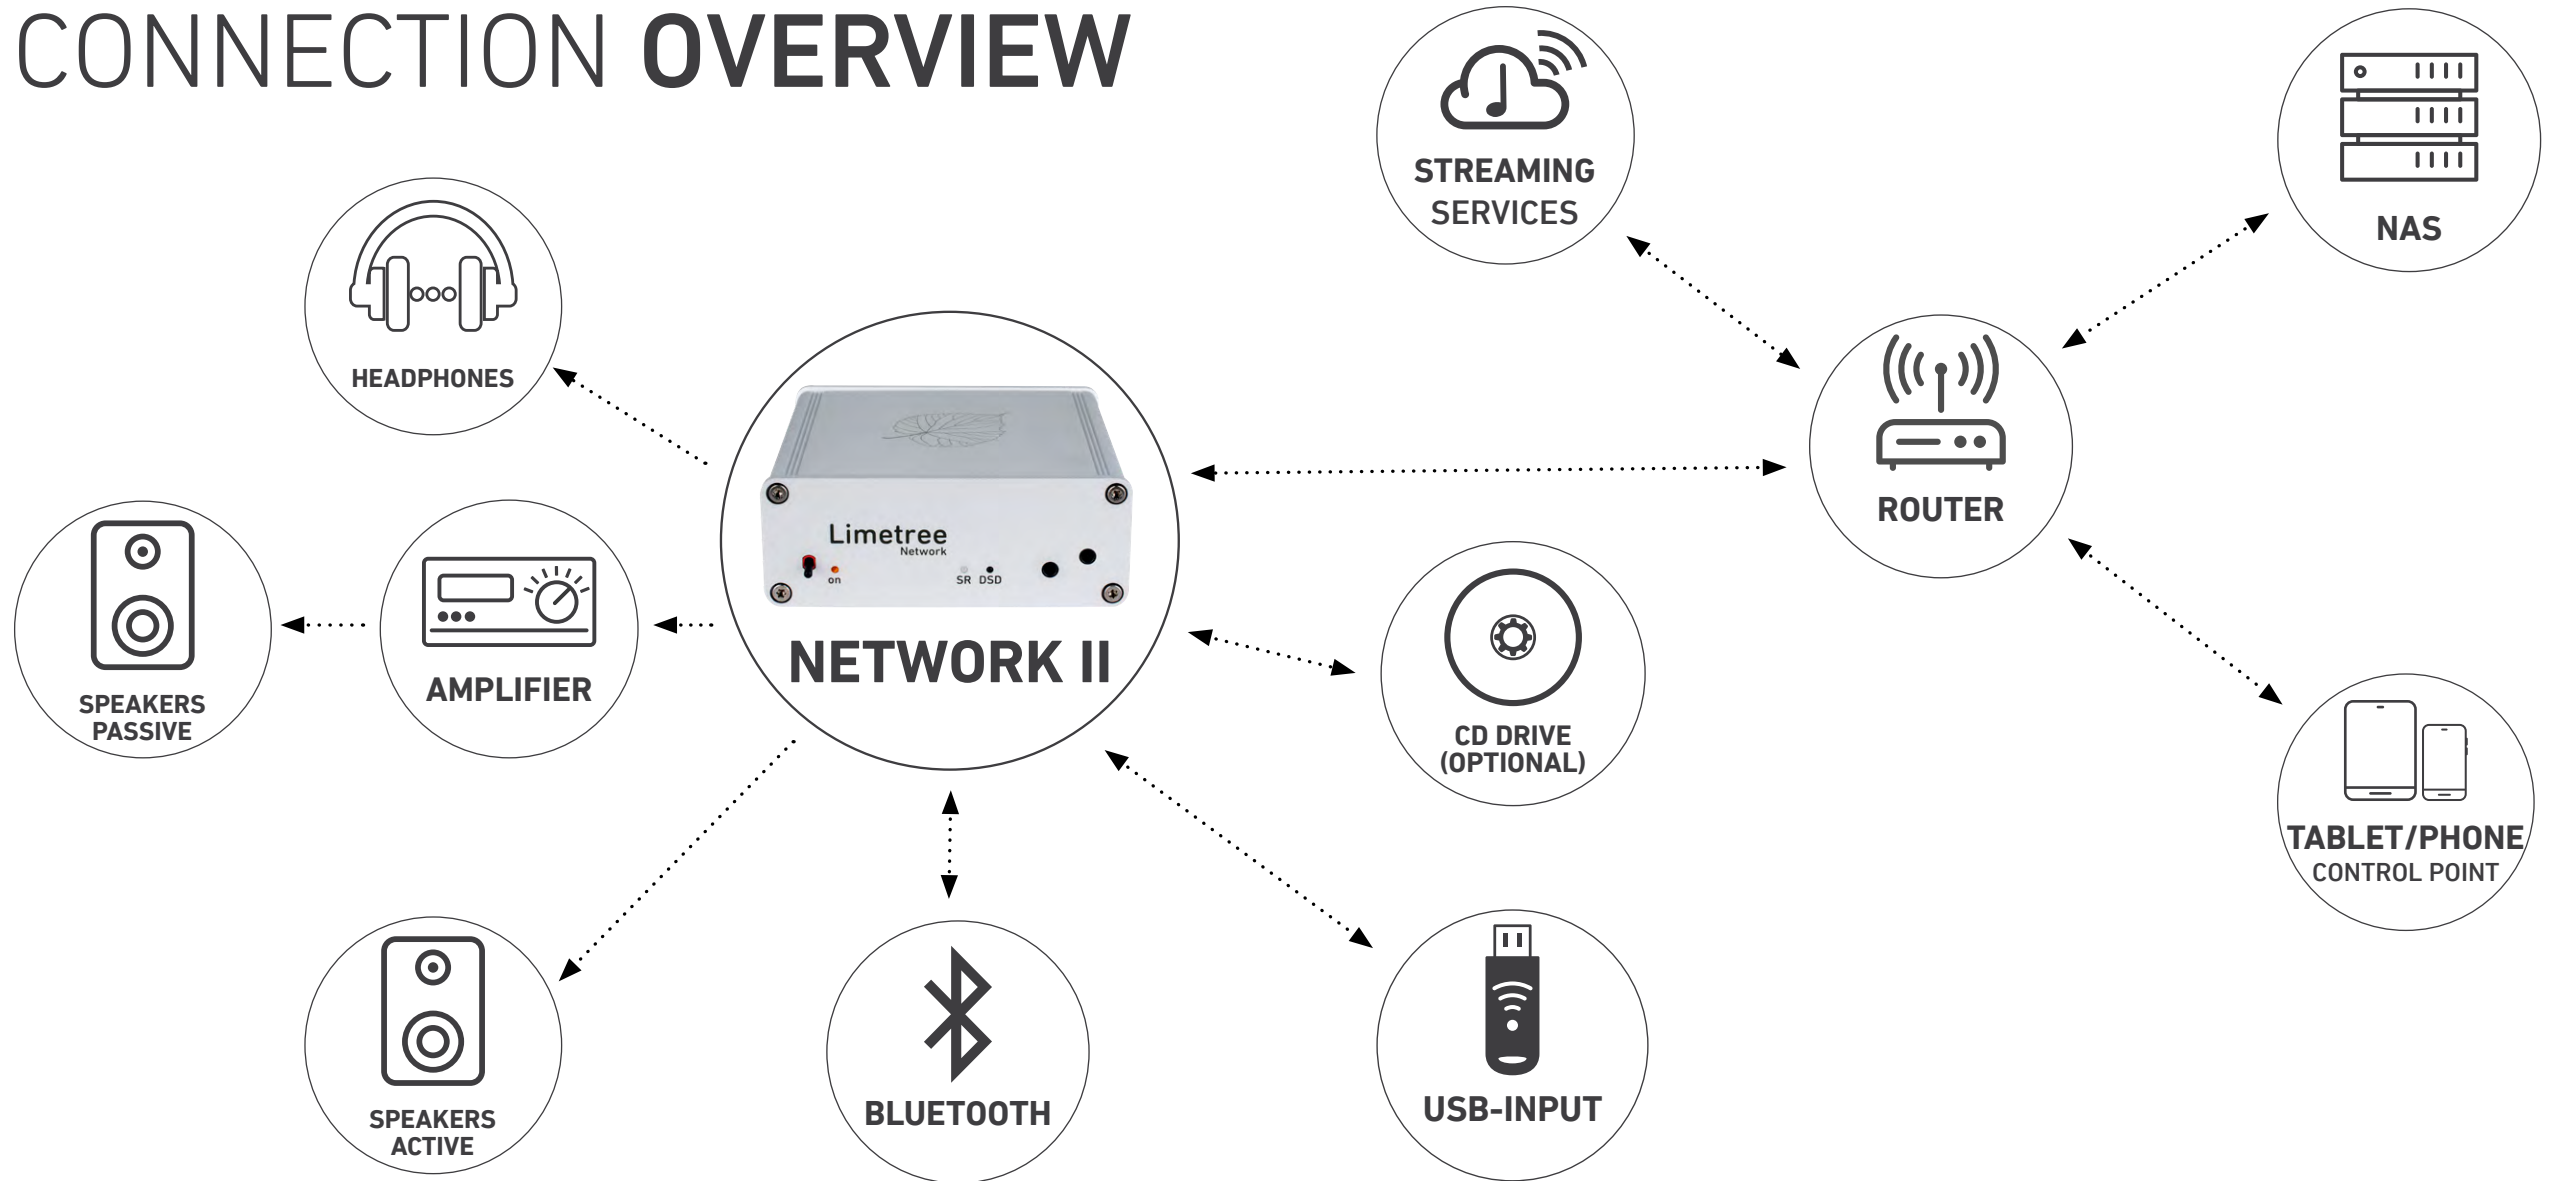

Streaming in several  
rooms with the  
multi-room function

Supports LAN, WLAN,  
Bluetooth, all codecs  
up to PCM 384

# CONNECTION OVERVIEW

# LIMETREE BRIDGE II

The **Limetree BRIDGE II** is a high-quality network adapter which can transfer music digitally in studio master quality from streaming services and local storage media to existing D/A converters or other devices with digital inputs. That way an existing hifi system can be upgraded with streaming for little money.

A professional studio engineering sample rate converter makes sure that all streamed formats can be played back on an existing converter without major losses in sound quality.

Very good sound results  
due to extremely  
low jitter at the  
digital output

Supports LAN, WLAN,  
Bluetooth, all codecs  
up to PCM 384

Stable and intuitive  
operation with the  
LINDEMANN app

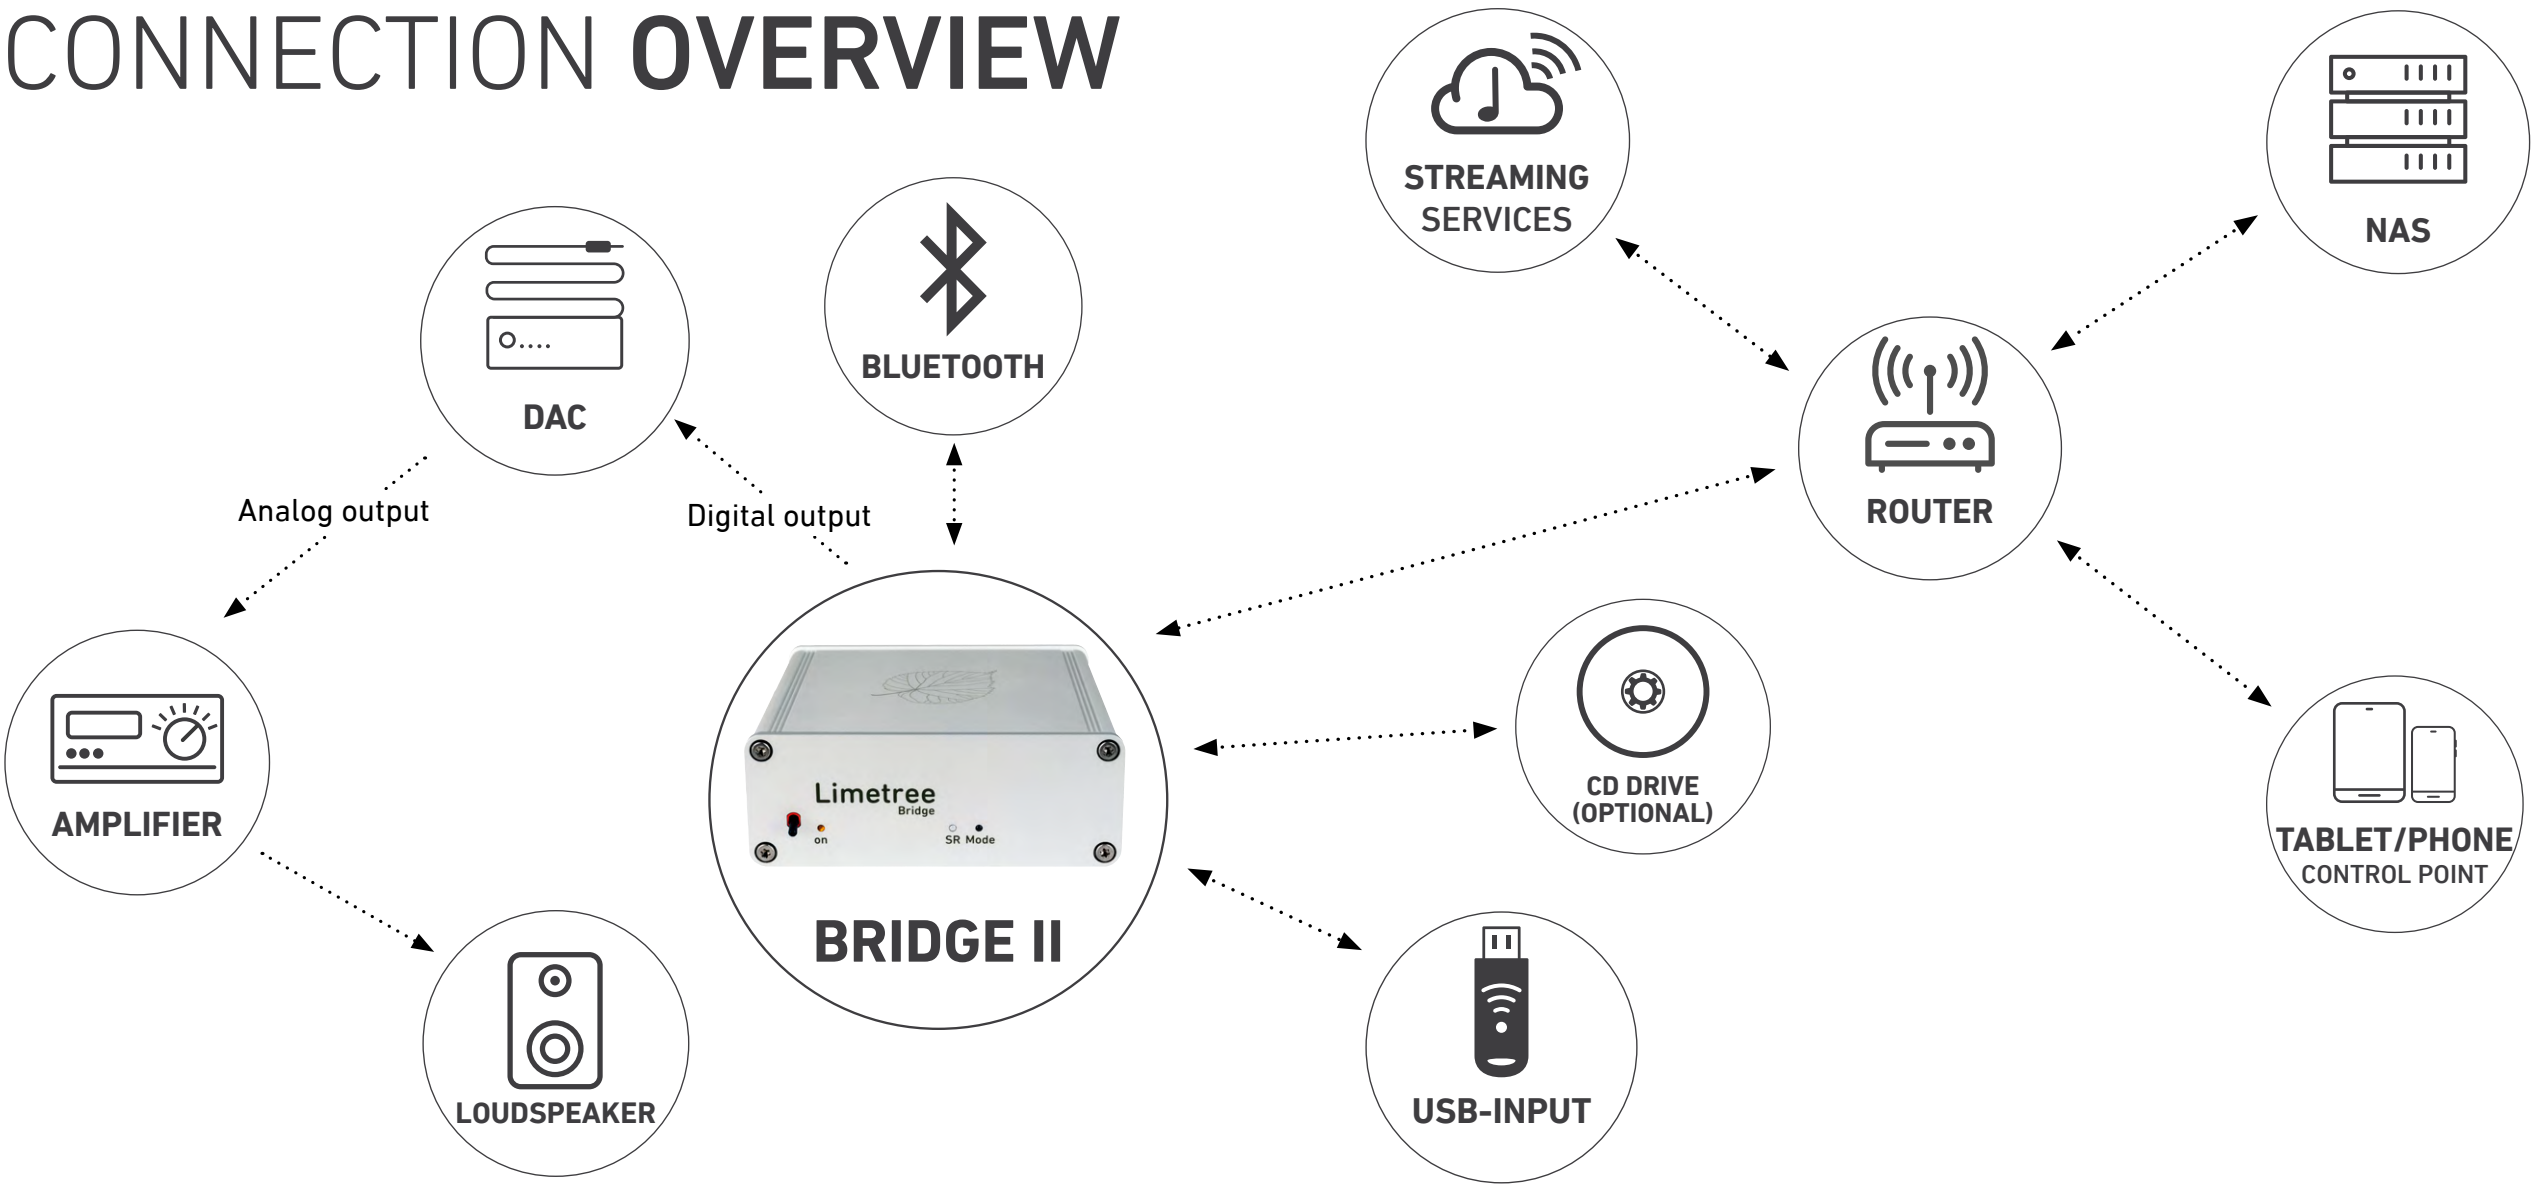

Streaming in several  
rooms with the  
multi-room function

Connection of external  
CD drives via USB

# CONNECTION OVERVIEW

„IT'S TRULY AMAZING HOW MUCH  
SOUND QUALITY CAN BE PACKED  
INTO SUCH A COMPACT DEVICE.“

(STEREOPLAY / GERMANY)

# PRODUCT OVERVIEW

LIMETREE **NETWORK II**

Excellent network player which can play back music in studio master quality from streaming services and local storage media.

LIMETREE **BRIDGE II**

High-quality network bridge which can play back music in studio master quality from streaming services and local storage media.

LIMETREE **PHONO II**

Universal phono stage with separate inputs for MM and MC.

LIMETREE **USB-DAC**

Top class digital-to-analog converter (S/PDIF / USB Audio Class 2) with playback up to DSD 512 and PCM 768 kHz.

# SMALL, BUT MIGHTY.
